

**SISnet User Club 1st edition**

**January 2017**

1. What is SISnetClub?
2. Who is it addressed to?
3. Why a club?
4. How does it work?
5. SISnet Forum

# 1. What is SISnetClub?

---

- It is a **communication tool** to keep clients informed about SISnet **evolution** and **news**
- It is an open space for **experience exchange** between client and software developer
- It is an **innovation** probe about **technological elements** applied to SISnet
- It is an **exclusive** service for clients, included in maintenance contract

## 2. Who is it addressed to?

---

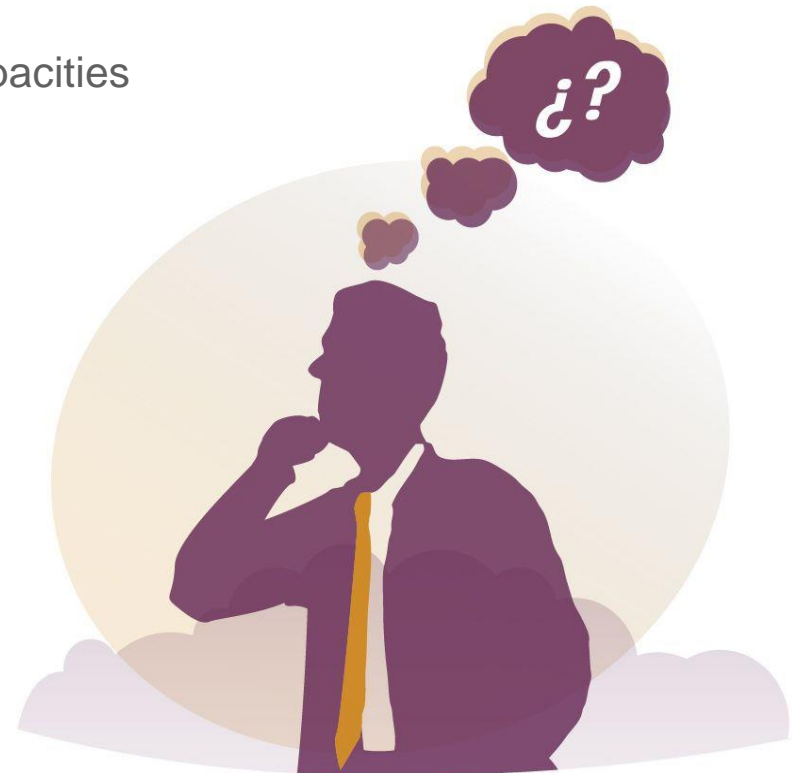

- Directors and area managers in development, technology, operations and innovation

### 3. Why a Club?

---

- To get to know the companies concerns, their **needs**
- To foster bidirectional **communication** between client and developer
- To align **shared objectives**
- To boost **synergies** and increase business capacities in SISnet environment

### SISnetClub main axis

-  SISnet Insurance **news**
-  Product **roadmap**
-  **Guest conference**
-  SISnet **Forum**

### SISnet Insurance news

-  SISnet team will describe the **improvements** in the new SISnet version or the **new functionalities** included in the current SISnet version.

-  The **topic areas** of the briefing will be:

Functional evolution

Business áreas evolution

Architecture

Tools

### SISnet Insurance roadmap

-  Exposition of the expected evolution for the product

### Guest conference

-  In each edition, there will be a presentation regarding a **special topic** related with insurance world, that will have a practical application for SISnet environment.

### What is SISnet Forum

It is an area opened to users **participation**, which makes us **move forward together**, with the aim of increasing the capacities of the product

### Which is the dynamic of the Forum?

- Discussion on the **roadmap**
  - Stablish priorities
  - New inputs
- Discussion on SISnet **Environment**
  - Improvements to be approached
  - Which should be kept
  - SISnet experiences

### Forum rules

- Raise issues of general interest for the rest of the audience
- Focus on SISnet and its environment topics
- Place comments constructively
- The comments should refer to SISnet or its partners, avoiding mentioning in an explicit way to persons or companies
- Raise debates with a general focus, not particular issues
